PowerYZer

Simpler and Safer Charging Combined with an Individual Design

Yazaki is completing its global product portfolio in the area of AC charging connector systems for the field of electromobility. **PowerYZer®** is Yazaki's new Type 2 charger (see image) and forms part of a comprehensive range of connectors. It is being presented to the public for the first time at the IZB 2016 in Wolfsburg.

The new charger complies with the IEC 62196-2 international standard and therefore meets all safety requirements for the European market. The Type 2 charger additionally offers a multitude of advantages for consumers, above all in the form of its increased charging efficiency, simple and convenient charging thanks to its ergonomic shape and individual and customer-specific design options.

Be it at home, work or at public charging posts, Yazaki's PowerYZer® guarantees reliable and robust charging using a single-phase or a three-phase charging mode.
