CUSTOMISED CABLING SYSTEMS

Individual solutions for individual customers

Customised

Yazaki, as the founder of the modern EDS, is a global market leader for products of excellent reliability and performance, with the highest customer satisfaction.

Besides being a major wiring harness and system supplier, Yazaki is expanding wiring harness activities to supply Tier customers with the same high-quality products, offering solutions for all special connections and applications of electrical components and systems.

CCS Sustainable solutions

An industrial leader, a reliable and innovative partner

A dedicated business unit called CCS (Customised Cabling Systems) is taking care of the supply for specific subsystems or sub-harnesses, for both automotive and for non-automotive applications.

This CCS team is fully integrated within the Yazaki Europe Component Business Unit and is using leading-edge technologies for wiring harnesses & components, fulfilling highest customer requirements for production, assembly and logistics with the aim of providing our customers maximum competitive advantage and best quality for complete customer satisfaction.

Competencies Unique benefits for our customers

Customer focus & best quality

Customised Cabling Systems is a full service supplier that can provide complete subsystems, support the Tier customers from initial concepts through design and development, mass production and all the way up to after-sales-service parts.

Yazaki has established a sound reputation in the market for sustainable solutions and the highest quality standards, making the company an attractive and trustworthy partner for its customers, while adhering to our most important principles of best quality, customer focus and continuous improvement.

Automotive

In recent years, automotive vehicles have undergone many technological changes in a short period of time.

Vehicles are now more comfortable, safer and more fuel efficient, but also highly complex. Being your partner, Yazaki is constantly adapting to these demanding and changing market requirements.

Non Automotive

Next to our proven track record and experience in the automotive industry, Yazaki is also increasingly active in different business sectors with the same focus on best quality products for complete customer satisfaction.

Inspiring Vision built on Strong Tradition

Take the lead - with your innovative partner

As a truly global company deeply rooted in Japanese cultural traditions and values, Yazaki is a reliable partner for its customers as well as a promoter of environmental sustainability throughout the world

As an owner-operated company, we are especially proud to be the world's largest producer of wiring harnesses. Customer satisfaction is thereby our primary focus and the foundation for good business results.

We at Yazaki put **customers first** and are committed to delivering superior value and services to all our customers – worldwide. We are certain that we all benefit from open dialogue and the honest exchange of ideas.

Yazaki is a **full service supplier** that can provide complete Electrical and Electronic Distribution and Display Systems (EEDDS) solutions, supporting the OEM from initial concepts through design and development, global mass production all the way up to after-sales-service parts.

Our leadership position in

- Electrical Distribution Systems
- Components
- Electronics and Instrumentation
- High Voltage

is maintained by the continuous development of our existing technology base. Adapting to new market conditions or customer requirements are key challenges welcomed by the Yazaki team.

Research and development activities aim to safeguard Yazaki's leadership position within its markets.

A Corporation in step
with the word

YAZAKI – from a pioneer in automotive wiring harnesses to a leading global player

A dynamic evolution of success

Yazaki's timeline of success dates back to 1929 when Sadami Yazaki began selling electric wires for automobiles. After important changes in governmental regulations in 1935, Japanese companies were allowed to start domestic automotive production – with positive effects for Yazaki.

In 1939 the company extended its business and in 1941 Yazaki Electric Wire Industrial Co. Ltd. was established with about 70 employees. At this time, automotive engineering was a promising branch of industry so in 1949 Sadami

Yazaki made an important strategic decision: to focus on the production of automotive wiring harnesses. This was a groundbreaking decision which resulted in today's global leadership.

Group business scope

Yazaki offers a diverse range of products in the global Automotive and Energy System sectors. We recently began to expand into a third sector of nursing care and environmental-related businesses.
